Maisel's aerial views of Utah's Great Salt Lake give the viewer almost no visual foothold, no clue to the meaning of these jewel-like swatches, delicately veined basins, and patchwork quilts of bloody water. With the exception of a shot of Robert Smithson's Spiral Jetty--a bleached curlicue breaking the surface of a wine dark sea -- the photos are gorgeous abstractions whose beauty is tainted only by the knowledge that its otherworldly coloration is the result of toxic industrial pollution.
